

AOpen and Stinova join forces on Digital Signage Solutions

Landsberg, Germany, November 17, 2009 - Stinova Ltd., developer of Digital Signage software solutions, and today's number one ultra Small Form Factor (uSFF) provider AOpen Inc. announced a partnership to jointly target the rapidly growing Digital Signage market segment.

This partnership leverages Stinova and AOpen's expertise and technical support capabilities to deliver turnkey solutions. AOpen provides hardware solutions that can be applied to anything from Digital Signage, Kiosk, POS (Point of Sale), vending machines, medical and education to automotive applications. A leader in efficiency-oriented computing, AOpen continues to utilize Intel® Core™2 Duo products and other energy efficient processors from Intel.

"We are pleased to increase our partner network with AOpen offering a broad selection of hardware solutions targeting many different applications" said Franz Hintermayr, Managing Director and CEO of Stinova. "We have completed testing and certification on various ultra small form factor hardware platforms based on Intel® technology from AOpen and successfully ported our Digital Signage software for both Linux and Windows", concluded Hintermayr.

This partnership between Stinovia and AOpen brings Stinova software to a wider audience with project winning solutions at highly competitive prices. Stinova's WEB based Digital Signage appliance software DMX and DMP offer unprecedented features and functionality that can be used in many different environments such as in-store promotions, Point-of-Sale, Shopping Malls, Public Foyers, Exhibitions, Museums and many others. Stinova's software makes it easy to combine complex media rich content elements with a few simple mouse clicks.

"We see Stinova as an independent software vendor partner offering cost effective and highly flexible product packages that are truly scalable from a stand-alone appliance up to complex Digital Signage networks" said James Hua, General Manager at AOpen Europe. "We are pleased to partner with Stinova who is offering an easy to use and easy to own software solution."

"The Stinova and AOpen solution utilizes the capabilities of the Intel® Core™2 Duo processors to gain the performance needed in emerging digital signage markets, while remaining energy efficient and Energy Star compliant." said Jose A. Avalos, director of digital signage at Intel.

Intel and Core 2 Duo are trademarks of Intel Corporation in the United States and other countries. Other names and brands may be claimed as the property of others.
