

Dear Smilla:

My monster Marby is so scary (not really). She is the size of a tiger, and has four legs. She has REALLY big spines

the size of a dinosaur's all the way down her back and down her long, long tail.

What color, you say?

Marby is purple and blue tiger striped. She has sharp teeth. Her spines are yellow and red.

If you saw my monster you would think she was a dragon crossed with a tiger crossed with a dinosaur. I can't wait to draw your monster. From, (student name)
