Synthesis Checklist

Use this checklist to help you synthesize data from different sources.

✔	Task	Notes
	I used my classification skills to create relevant and useful categories for my data.	
	I included all relevant data in my synthesis.	
	I considered how the categories I created are connected.	
	I added new categories that include new information, when necessary.	
	I considered information from what I have learned in my other classes.	
	I considered information from my personal experiences.	
	I looked for areas of similarity and difference.	
	I used various strategies to think about my data, such as sorting, sketching, and brainstorming.	
	I developed overall themes.	
	I thought about how my data and categories fit into my themes.	
	I created statements that connect and enhance the data.	
	I chose an appropriate format for expressing my synthesis.
