

The Seasons of the Year

Billy
Jan
Sarah
Ryan

There are 4 seasons in each year.

summer

fall

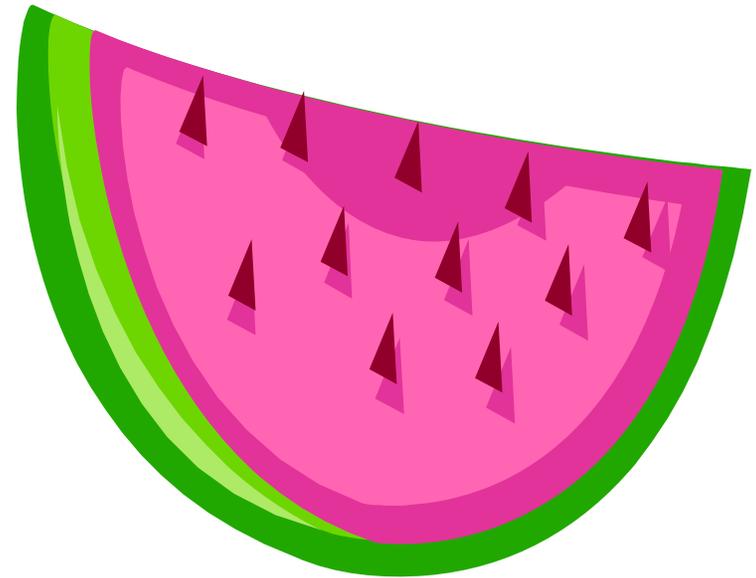

winter

spring

In the summer:

- It is HOT!
- The sun shines a lot.
- We go to the pool.
- We take vacations.
- School starts when summer is almost over.
- Trees have lots of leaves.

In the fall:

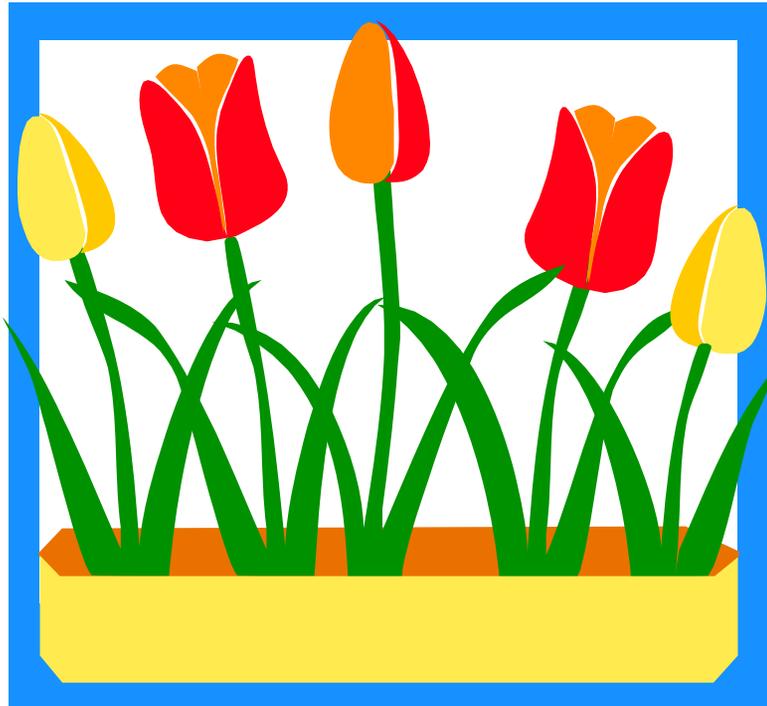

- The days get shorter.
- It's cooler.
- It rains sometimes.
- We go to school every day.
- Farmers harvest their crops.
- The birds fly south.
- Leaves fall off the trees.

In the winter:

- It is COLD!
- It's dark a lot.
- It might snow, and it rains a lot.
- Christmas is in the winter.
- We build snowmen if it snows.
- The trees don't have leaves.

In the spring:

- The days get longer.
- It's getting warmer.
- It still rains a lot.
- School ends when it's almost the end of spring.
- We plant seeds and watch them grow.
- The birds come back.
- Trees get new leaves.

Trees change in every season.

Summer

Fall

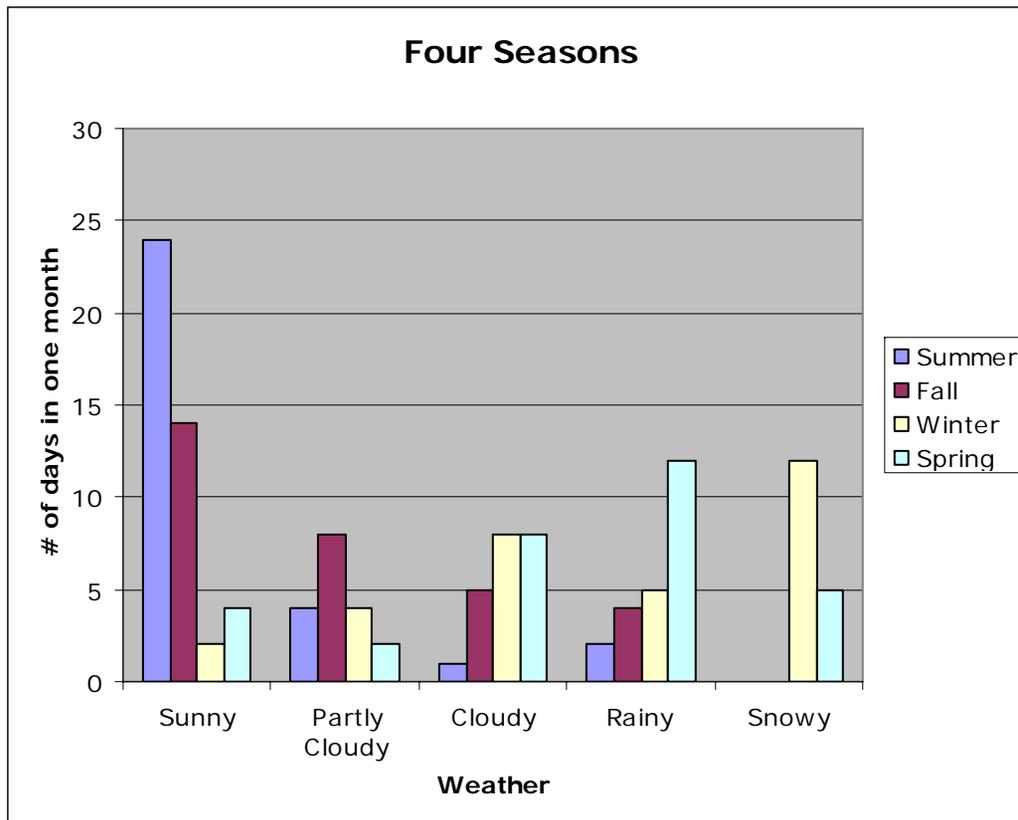

Winter

Spring

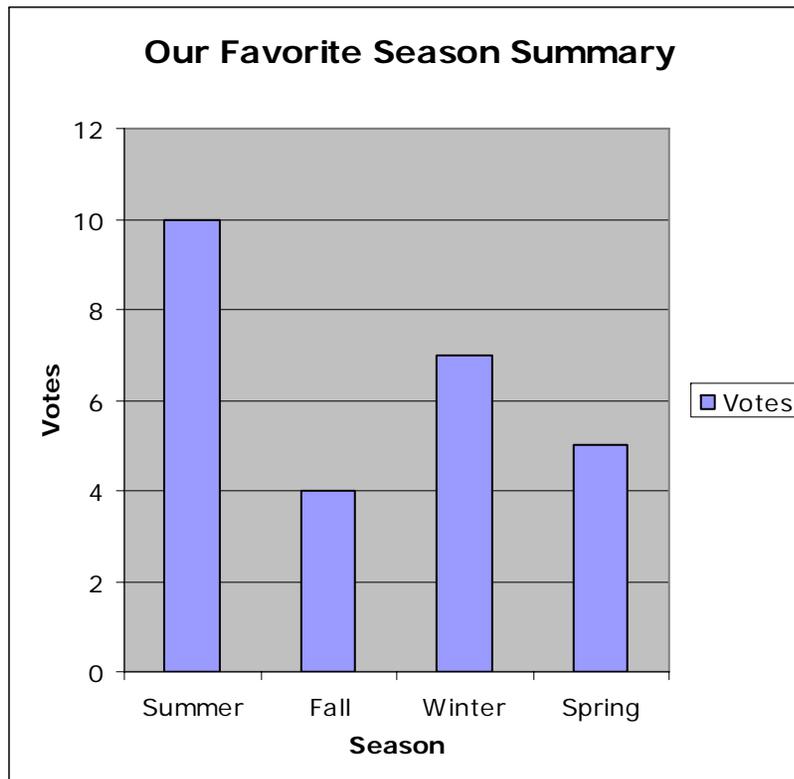

Weather in the Four Seasons

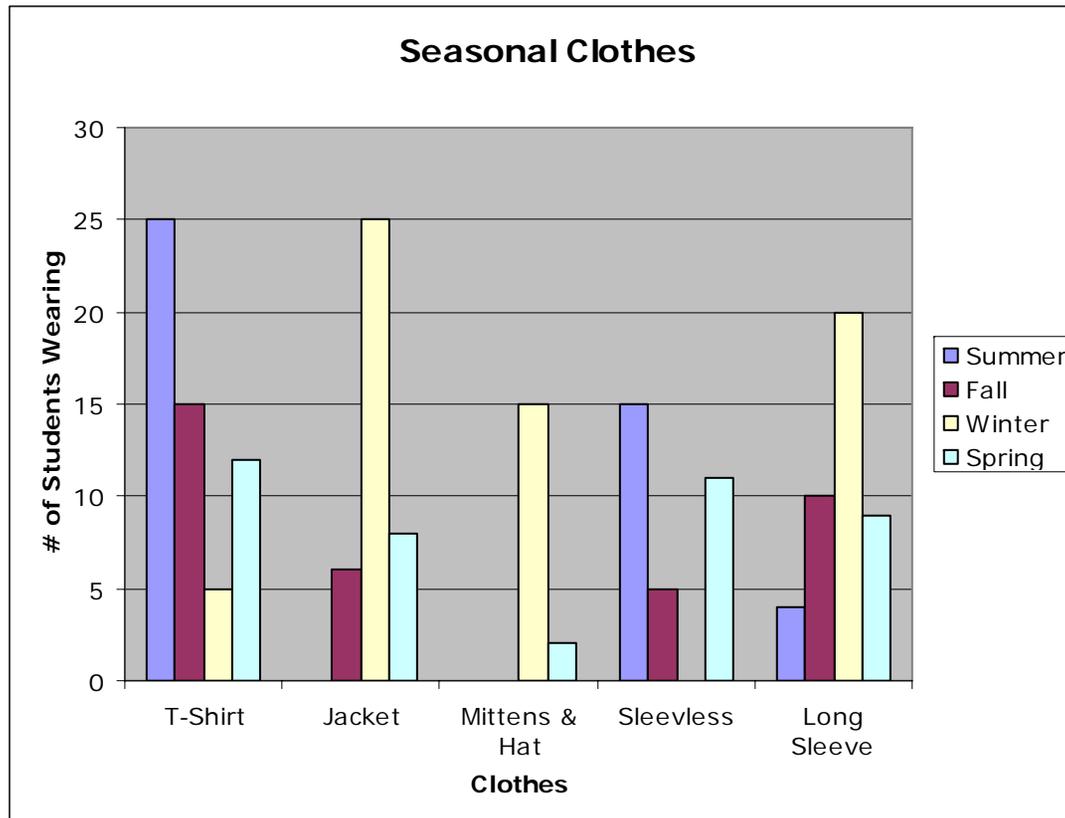

This graph shows that spring has the most rainy days. We think that is why there are so many flowers in spring.

Our Favorite Season Graph

This graph shows that most people in our Class like summer best and fall the least.

Seasonal Clothes Graph

This graph shows that jackets are worn the most in winter. We think that is because in most places in the world it is coldest in the winter.
