

## TRASH FROM THE PAST—Social Studies Project Feedback

Components	Self-Check Comments	Peer Comments	Teacher Comments
Research the history of waste management in the local community. What new technologies or applications in recycling and conservation have been implemented?			
Compare current waste management plans of an assigned country to that of the United States.			
Compare waste management plans from an ancient civilization.			
Use a graphic organizer to represent comparison statements and data.			
Use historical research to support a proposal in a science project.			
Write a reflection that answers the Essential Question, <i>Social responsibilities—who decides?</i>
