

Intel® Teach Program Bringing Technology and Teaching Together.

Deliver 21st century education.

Intel® Teach courses bring free professional development on technology integration to teachers worldwide. Whether you are new to technology or teach computing, there is a course for you. Facilitators are certified Master Teachers from your community, so they understand the unique challenges and opportunities in your region.

Get the expertise to transform teaching and learning.

- **Intel® Teach Getting Started Course:** Ideal for K-12 classroom teachers with little or no computer experience, this course covers classroom software productivity tools and student-centered approaches to learning.
- **Intel® Teach Skills for Success Course:** Ideal for computer teachers who wish to develop students' 21st century learning skills—you'll receive training on student curriculum that develops digital literacy, critical thinking, problem solving, and collaboration skills.

For more information on the Intel® Teach Program, visit www.intel.com/education/teach.

"This program is highly needed ... Technology integration can only happen when teachers are comfortable with technology themselves. Thank you for providing this product that will help teachers become comfortable with technology tools." —*ISTE NETS-S Product Review*
