## Explanation of Form and Function

Explanation of Form a			1
Component	Form and function of	Description of form and	No explanations of form or
	component is explained in	function of component is	function are included.
	detail.	explained but is not backed by	
		research or it is not complete	
		and accurate.	
Keep - A tower or tall			
building inside of the castle			
which was the last resort to			
run for protection when			
under attack. Usually, but			
not always square or			
rectangular.			
Towers - Each castle			
should have at least 2. The			
best towers were round to			
prevent attack and were			
used for guarding and			
observation. They were			
also used for sleeping			
quarters or as dungeons to			
hold prisoners. Walls or Curtain - Should			
be tall and sturdy in			
construction. Many castles			
had inner and outer walls			
for even better protection.			
Gatehouse - A sturdy			
structure built into the wall			
of the castle by which to go			
in and out of the castle.			
Had heavy wooden gates			
or doors and lots of			
defensive traits like arrow			
loops in the sides and			
murder holes in the roof. A			
portcullis or heavy iron gate			
could also be lowered to			
block the entrance.			
Drawbridge - A wooden

structure that could be raised or lowered to prevent intruders from crossing the moat into the castle. Windows and arrow loops - Windows were long and narrow, sometimes covered with stained glass designs. Windows would be placed high in a castle for defensive purposes and would have large wooden shutters to close from the inside. Arrow loops were narrow slits cut into the walls from which archers could shoot arrows at intruders. Battlements - These were the main fighting areas along the tops of the castle walls. They had a tooth (merton) and notch (embrasure) appearance. Moat - A deep trench usually filled with water that surrounded a castle.

(embrasure) appearance.    Moat - A deep trench    usually filled with water that    surrounded a castle.
Moat - A deep trench usually filled with water that surrounded a castle.
usually filled with water that surrounded a castle.
surrounded a castle.
Murder Holes: A section
between the main gate and
an inner portcullis where
arrows, rocks, and hot oil
could be dropped from the
roof though holes.
Chapel - A building that
served as a place of
worship. Could be a
separate building or be part
of the keep, tower, or
gatehouse. Often was a
private church for the lord
and his family.
Stable - Used to house
animals and livestock of all
kinds.
Barbican - The Barbican
was a forward defensible
structure jutting out or set in
front of the main castle or
walls.
Great Hall - The building in
the inner ward that housed
the main meeting and
dining area for the castle's
residence; throne room.
