Intel® Teach
Pre-Service Program

Preparing Pre-Service Teachers for Technology-Enabled Personalized Learning

Intel® Teach is a worldwide initiative to provide teachers with the skills to effectively integrate technology into existing curriculum to improve student learning. The Faculty review provides hands-on exploration of Intel Teach Elements courses and online tools and resources for integration into existing college course syllabi or development of new courses. The Faculty Review event, access to online tools and resources, all materials and ongoing customer support are provided without charge.

Pre-Service Faculty Who Attend:

- Receive one and a half days (11 hours) of hands-on exploration with free online tools and resources to engage Pre-Service teachers in using technology to improve teaching and learning in the K-12 classroom.

    - Activities focus on when, where and how to incorporate resources into your course syllabi via online, face-to-face, or hybrid approaches.

- Learn digital skills while reviewing online resources to use right away (how to model digital learning, use Google Docs, engage students with online tools, and collaborate via social networking).

- Access curriculum materials for students at no charge!

Attend a Faculty Review

- Participation is open to faculty (full time or adjunct) who teach Pre-Service teachers and/or courses that address planning for instruction.
- Faculty should have intermediate technology skills.
- Faculty who use Intel Teach Elements courses are asked to report number of Pre-Service teachers trained by registering at http://teachonline.intel.com/elements
