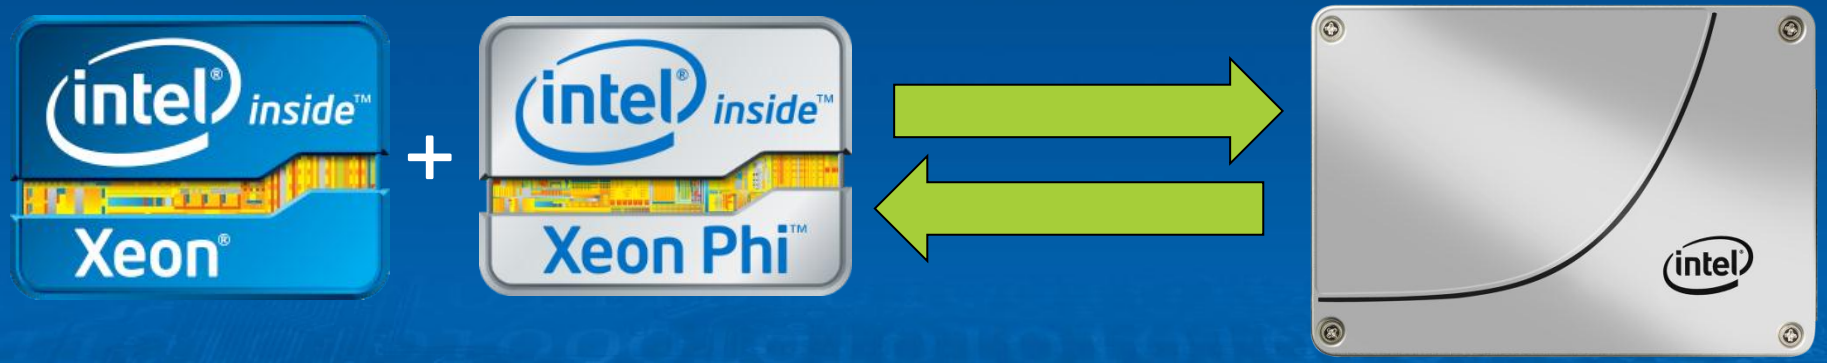
Highly Parallel Applications

*Parallelism does the work to extract real Insights from Big Data*

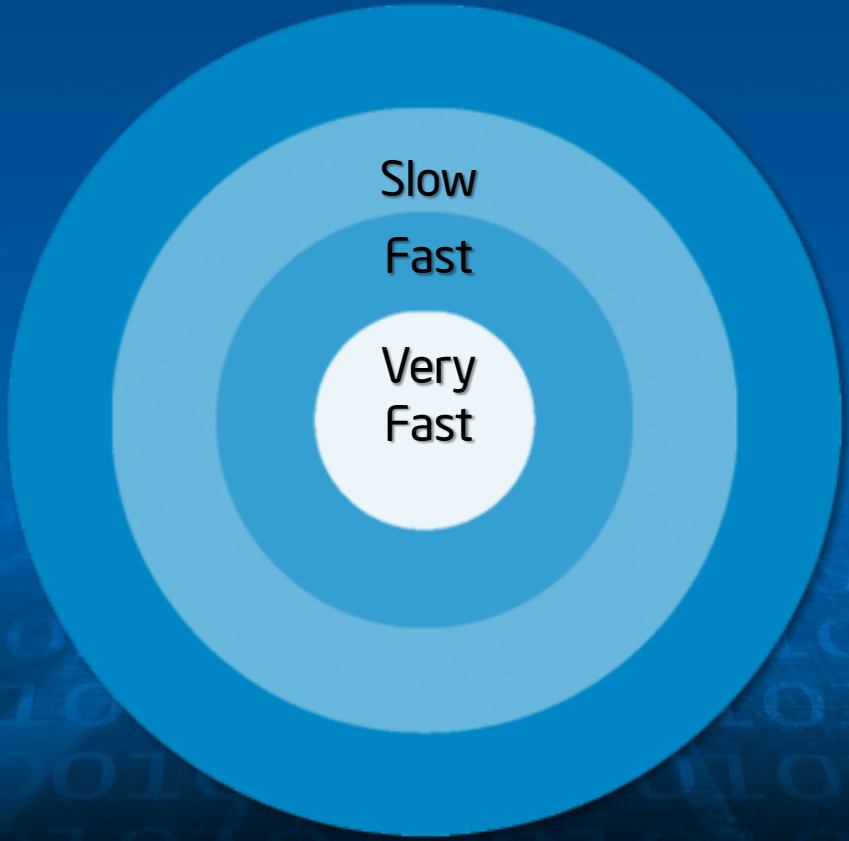
# Data Center: Environment is evolving



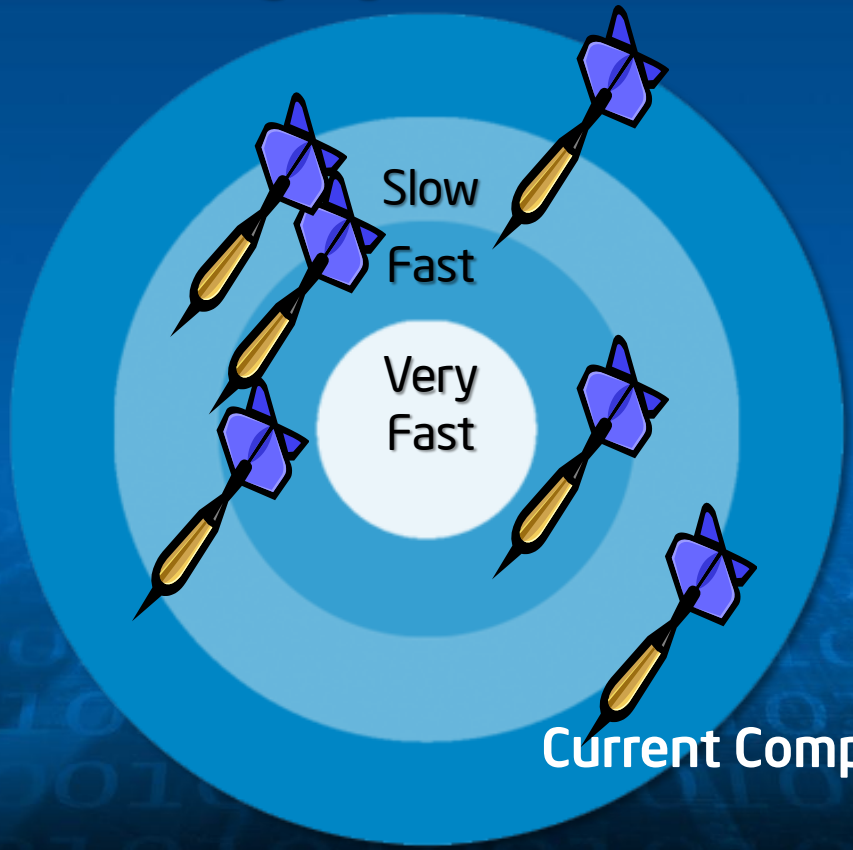
*Cores must be supplied with data continuously to achieve optimal performance and results*

# Conventional Wisdom:
# All SSDs are suitable for Data Center solutions

# Not all SSDs are created equal

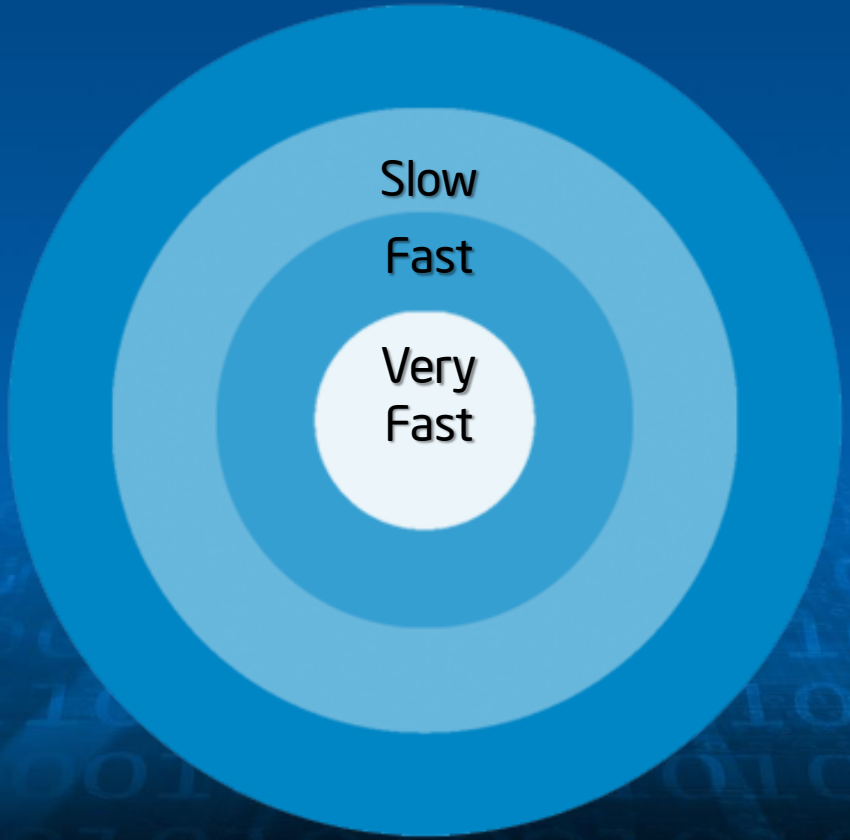


# SSDs – Highly variable IOPS

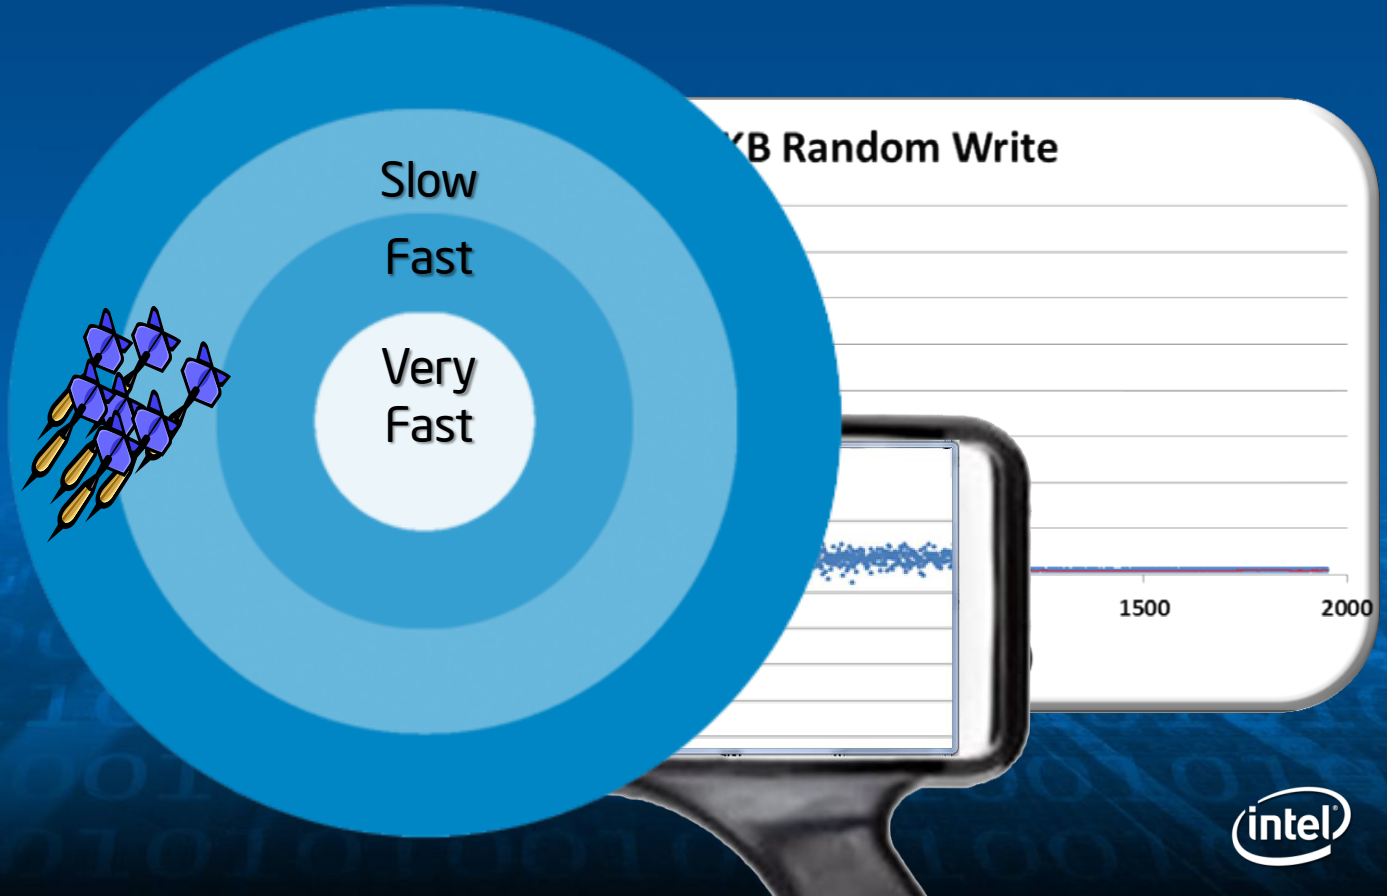


Current Competitor's SSD

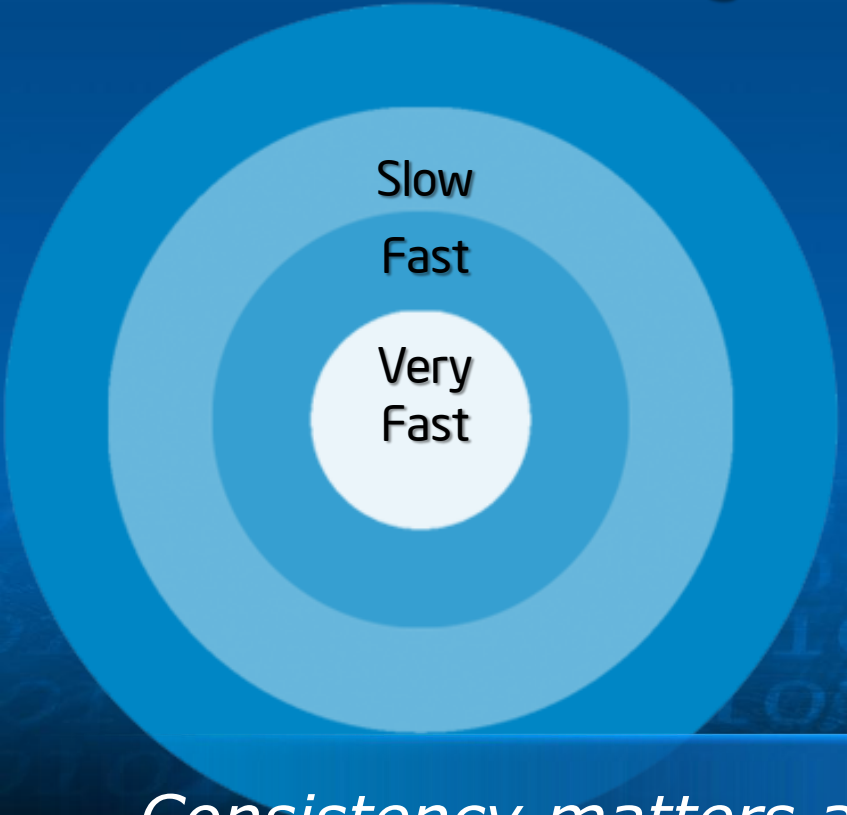
# HDDs: Very low IOPs

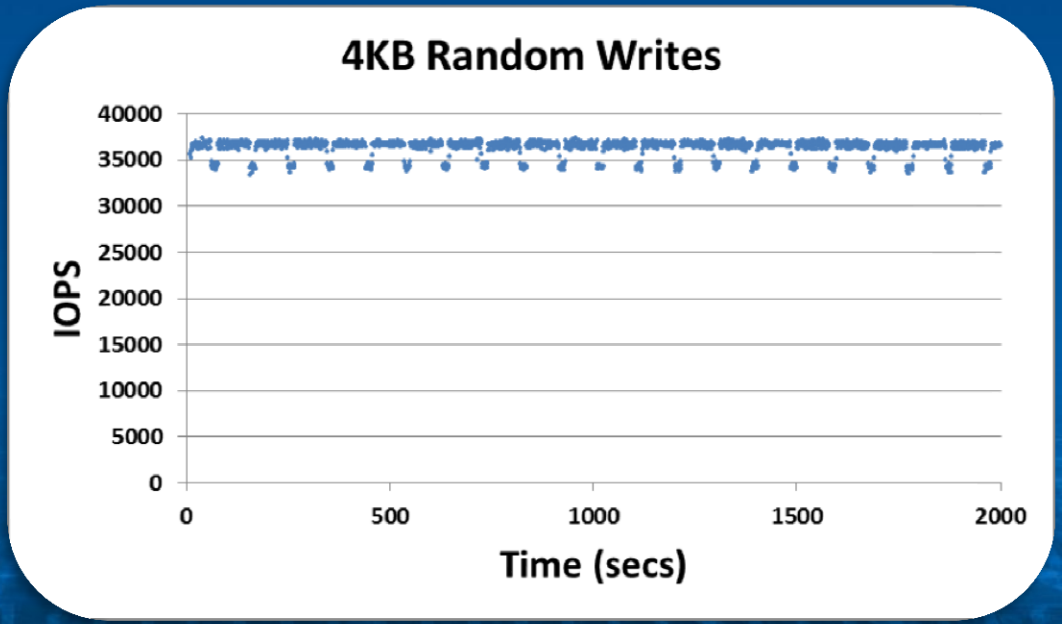


# HDDs: Very low IOPs



# High performance data centers require a new generation SSD





*Consistency matters as much as IO performance*

# Introducing Intel® Solid-State Drive DC S3700 Series

- Fast and Consistent Performance
- Stress-Free Protection
- High Endurance Technology

*Consistently Amazing*

# Customers Agree

- **HP is driving leadership in solid state drive adoption across broad enterprise segments**
- **HP has been working with Intel on bringing their next gen SSDs to meet HP's world-class enterprise requirements**

*"HP believes products like the S3700 Series will bring accelerated growth to solid state in the enterprise."*

*-- Jim Ganthier, VP, HP Industry Standard Servers*

# Intel® SSD DC S3700 Series features the 3rd Generation Intel-developed controller

*Utilizes continuous background cleaning*

# Intel® SSDs accelerate a broad range of Enterprise Applications
