The next generation of Workspace Management… now!

**scense**

- Thought leadership in Workspace Management
- Founded in 2006
- Patented Technology
- Fourth generation product
- Seasoned team: Microsoft, VMware, RES, Softricity, CDG
- Deployed at more than 150.000 users
- Partner Centric Focus

**Gartner**®

1. **Cost Control and Consolidation**
   Controlling the cost of IT and consolidating IT resources.

2. **Governance and Management**
   Implementing rules and regulations and ensuring compliance.

3. **Flexibility**
   Being able to benefit from new technology without high adoption costs.

4. **Anytime Anywhere Computing**
   Ensuring availability of IT resources anywhere around the world.

5. **Speed and performance**
   Ensuring shorter time to revenue, service and productivity.

**scense**

Scense has created a technology to configure in a dynamic way, ready to use Windows based applications and provision them in real-time, to personalized Workspaces (physical or virtual, company or employee owned), whereby the personal settings will be applied wherever the users choose to work.
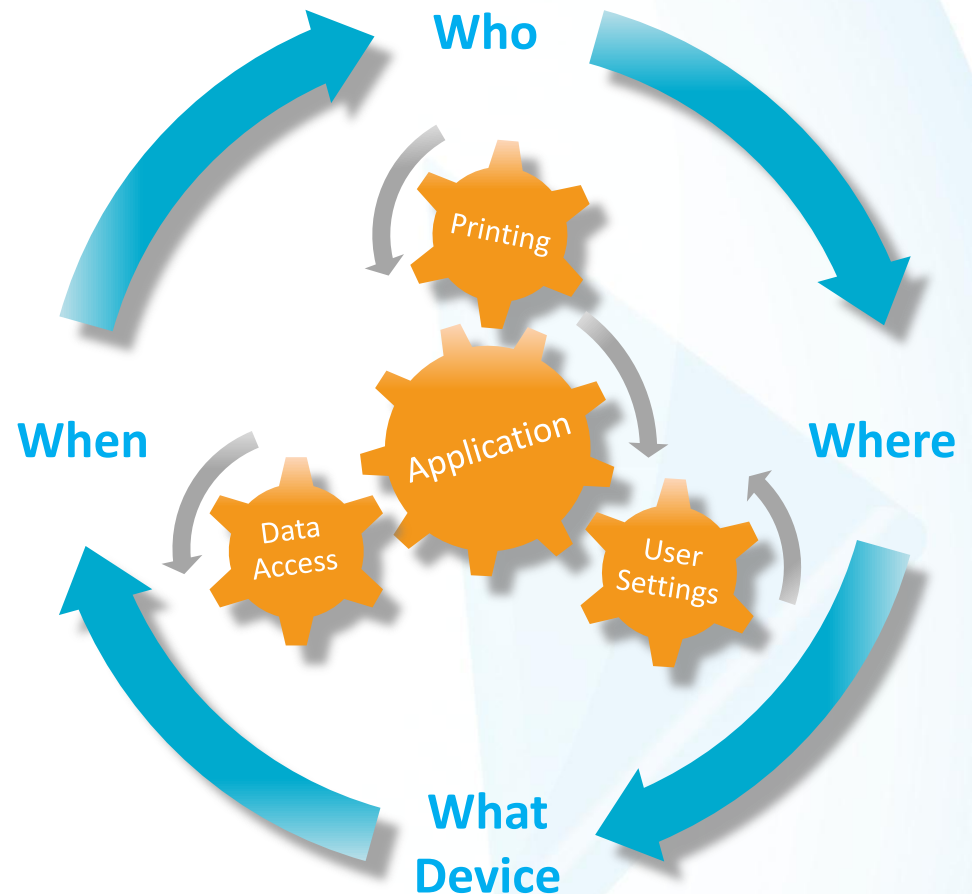

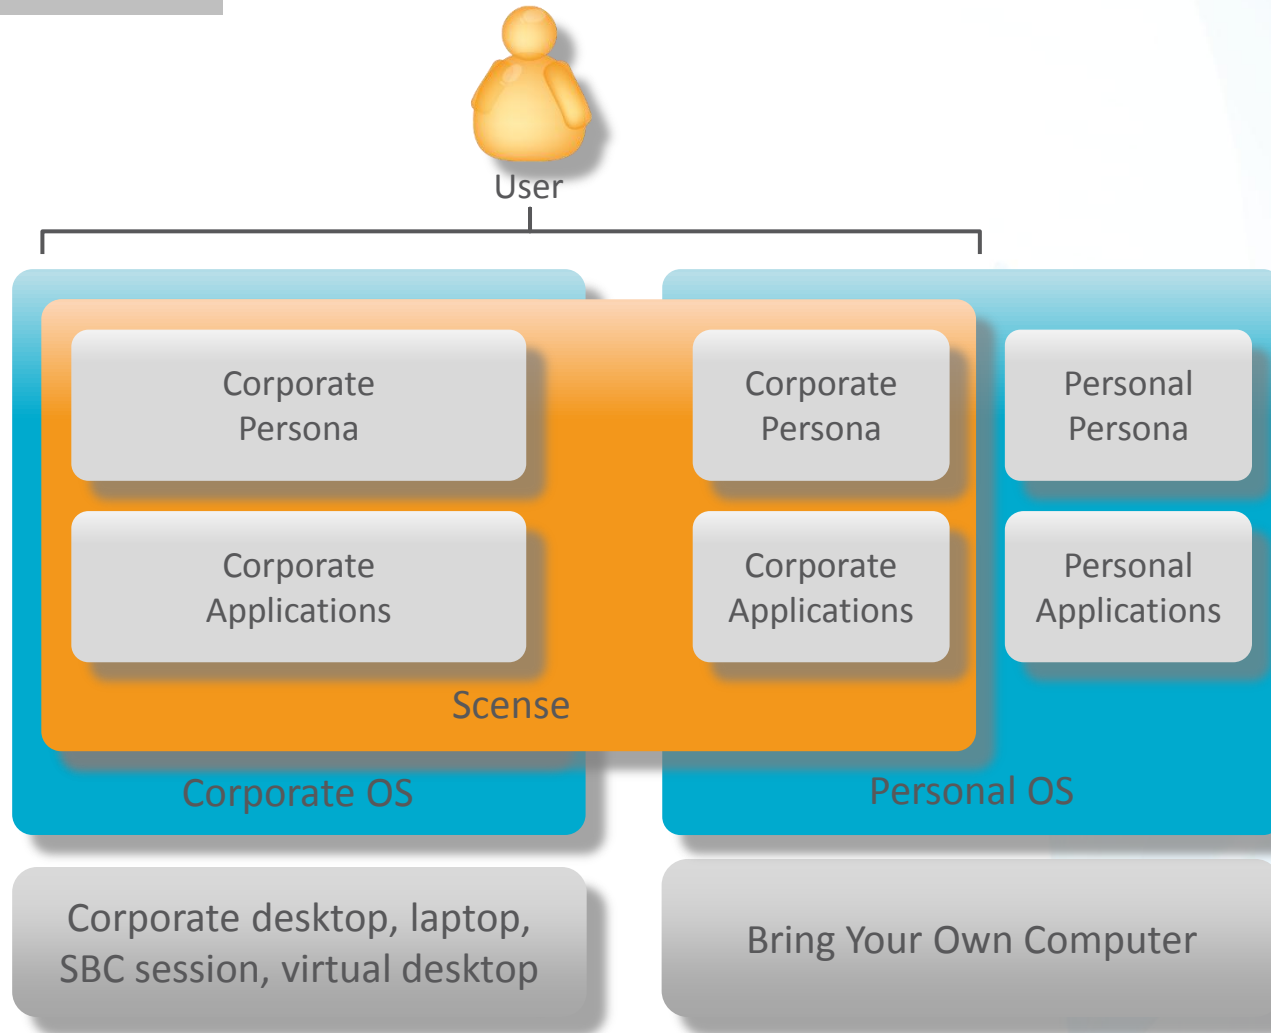

How may we help?

✓ **Cost Control and Consolidation -** by providing central management for *all* desktops, by simplifying IT management tasks and by providing self service tooling.

✓ **Governance and Management -** by managing *all* desktops in real time, based on the user's context and by increasing IT's span of control outside the corporate network and towards employee owned devices.

✓ **Flexibility -** by supporting and leveraging all common application and desktop delivery types and by keeping IT departments from having to choose a specific architecture.

✓ **Anytime Anywhere Computing -** by delivering and managing IT resources and workspaces on *all* devices: virtual or physical, company or employee owned, in- or outside the lan, online or offline.

✓ **Speed and Performance –** by simplifying the preparation and delivery of applications and other IT resources while supporting local execution or execution in the datacenter whichever delivers the best user experience.

![scense logo]

**Dynamic Application Control**
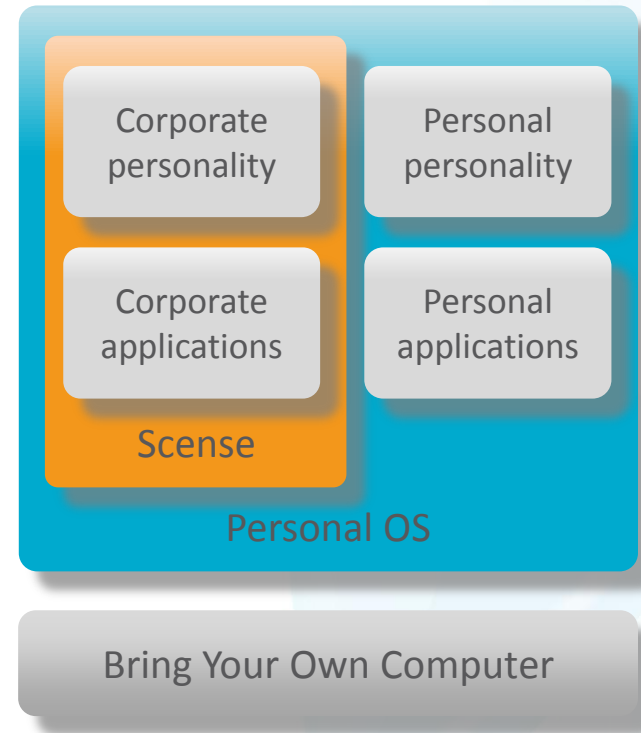

Applications, and everything that is related to an application, are dynamically delivered and configured based on an individual's changing context.
