

EXHIBIT B

b. the right to object to plaintiffs' use of any document produced pursuant to this set of Requests, including pursuant to the terms of the protective order entered in this case, in any subsequent proceeding in, or trial of, this or any other action;

c. the right to object on any grounds at any time to any other discovery involving documents produced pursuant to this set of Requests; and

d. the right to amend these responses in the event that any documents are unintentionally omitted from production. Inadvertent identification or production of privileged documents or information by Intel pursuant to these Requests does not constitute a waiver of any applicable privilege.

2. Nothing contained herein or provided in response to the Requests consists of, or should be construed as, an admission relating to the existence or nonexistence of any alleged facts or information referenced in any Request or that Intel is in agreement with plaintiffs' characterization of the facts in any such Request. By indicating that Intel will produce any responsive documents, Intel does not represent that such documents exist or are in its possession, custody, or control but only that it will conduct the searches indicated for the documents sought.

3. Consistent with its obligation under the Federal Rules of Civil Procedure, Intel will make reasonable efforts to respond to each Request, to the extent that no objection is made, as Intel understands and interprets the request. If plaintiffs subsequently assert an interpretation of any Request that differs from that of Intel's, Intel reserves the right to supplement its objections and responses and to produce and use additional documents.

4. Intel makes the following responses upon presently available information and without prejudice to Intel's right to utilize subsequently discovered facts or documents.

5. Intel intends its responses to be made pursuant to the Protective Order and Stipulations entered in this action.

GENERAL OBJECTIONS

1. Intel objects to each Request herein to the extent that it seeks documents or information protected from disclosure by the attorney-client privilege or work product doctrine (other than the limited, non-core work product information that Intel has agreed to produce pursuant to the non-waiver stipulation that the parties have entered into in this litigation), joint defense privilege, or any other applicable privilege.

2. Intel objects to AMD's "Definitions," "Instructions," and "Documents to Be Produced" to the extent that they impose or attempt to impose obligations beyond those required by the Federal Rules of Civil Procedure and the Local Rules of the District of Delaware.

3. Intel objects to each Request herein to the extent that it is argumentative and/or calls upon Intel to interpret legal theories or to draw legal conclusions.

4. Intel objects to the definition of "Intel" as imposing obligations on Intel beyond those authorized by the Federal Rules of Civil Procedure and as purporting to require Intel to produce documents that are not within its possession, custody, or control. In this regard, Intel objects to the definition of "Intel" as including "all past and present officers, directors, agents, representatives, employees, consultants, attorneys, entities acting in joint venture or partnership relationships with defendants, and others acting on either of their behalf."

5. Intel objects to Instructions 1-3 related to the Document Requests to the extent that they purport to impose on Intel obligations that go beyond those authorized by the Federal Rules of Civil Procedure or that are unduly burdensome. In this regard, Intel objects to AMD's

demand that it produce “all responsive documents that are within the possession, custody or control of Intel, including its officers, directors, agents, attorneys, employees and other persons acting on Intel’s behalf,” and does not construe these Requests as requiring the production of documents in the possession of outside counsel, specifically internal communications among outside counsel.

6. Each and all of the foregoing General Objections are hereby expressly incorporated into each and all of the following specific responses. For particular emphasis, one or more of these General Objections may be reiterated in a specific response. The absence of any reiteration in a given specific response is neither intended as, nor shall be construed as, a limitation or waiver of any General Objection made herein. Moreover, the inclusion of a specific objection to a specific response is neither intended as, nor shall be construed as, a limitation or waiver of a General Objection or any other specific objection. The parties have met and conferred on issues involving many of the requests and objections, and the undersigned counsel believes that Intel is producing documents consistent with AMD’s requests and appropriate privileges as referred to herein.

GENERAL RESPONSE TO RULE 30(B)(6) DEPOSITION SUBJECT MATTERS

Intel hereby incorporates its May 1, 2007, “General Response to Rule 30(b)(6) Deposition Subject Matters,” to the extent such general response is not inconsistent with anything herein.

Additionally, some of the documents Intel previously produced on remediation issues are responsive to certain of AMD’s 30(b)(6) deposition topics.

GENERAL RESPONSE TO DOCUMENT REQUESTS

Intel hereby incorporates its May 1, 2007, "General Response to Document Requests," to the extent such general response is not inconsistent with anything herein.

Additionally, Intel represents that it has made reasonable efforts to produce (subject to the date ranges on Exhibit A and to claims of attorney-client privilege and work product protection, and without collecting documents in the custody of Intel's outside counsel) all documents responsive to AMD's "Causation/Culpability" document requests in the files of the following individuals on Exhibit A: Eva Almirantearena, Roy Batista, Kelly Wright, Perry Olson, Curtis Smith, Dorr Clark, and William Stokes. Intel believes that those individuals, except for Kelly Wright, are the Intel personnel who had the most significant roles with respect to the creation and/or implementation of Intel's retention plan and who contemporaneously sent or received an appreciable quantity of relevant non-duplicative material regarding these topics. With respect to the remaining individuals on Exhibit A, Intel further represents that it has made reasonable efforts to produce (subject to the date ranges on Exhibit A and to claims of attorney-client privilege and work product protection) those documents that are most likely to contain material, non-duplicative information regarding the "Causation/Culpability" requests. Intel has produced, or will be producing, documents from the files of Intel personnel it believes are the Retention Custodians¹ most likely to have contemporaneously sent or received an appreciable

¹ As used herein, the term "Retention Custodians" refers to the individuals identified in Exhibit A (attached hereto), who are the individuals in the legal and IT departments of Intel whom Intel has identified to include the key players in the creation and implementation of the retention plan, as previously represented to AMD. Numerous other IT personnel were involved to some extent in the implementation of Intel's retention plan.

quantity of relevant non-duplicative material. Accordingly, the productions constitute a comprehensive response reflecting the information Intel reasonably believes to be most material to those requests, subject to the privileges involved. Further, Intel represents that it has not knowingly excluded from production the document of any Intel employee on the ground that that document is harmful to Intel on "Causation/Culpability" issues. Additionally, some of the documents Intel previously produced on remediation issues are responsive to certain of AMD's "Causation/Culpability" requests. Further, with respect to certain of AMD's document requests, Intel is producing documents from additional sources with relevant information.

Documents sufficient to describe fully any standard Intel corporate evidence preservation policies and practices applied in connection with actual or threatened litigation, and/or governmental or internal investigations.

RESPONSE TO REQUEST FOR PRODUCTION NO. 1:

Intel incorporates its General Objections and General Response to Document Requests by reference. Intel objects to this Request on the basis that the practices followed in other litigations and investigations directly implicates the attorney-client privilege and work product doctrine, and is beyond the scope of the discovery contemplated by the Special Master's Order.

SUPPLEMENTAL RESPONSE TO REQUEST FOR PRODUCTION NO. 1

Intel reasserts its responses and objections to this Request.

REQUEST FOR PRODUCTION NO. 2:

Documents sufficient to describe fully the operation, purpose and application of Intel's automatic deletion policies and practices applied to email or other electronic data.

RESPONSE TO REQUEST FOR PRODUCTION NO. 2:

Intel reasserts its objections to this Request. Intel believes that the Retention Custodians most likely to possess an appreciable quantity of contemporaneously-created relevant documents regarding such general policies are Eva Almirantearena, Roy Batista, Dorr Clark and Curtis Smith. Intel has re-reviewed documents obtained from these Retention Custodians with respect to this Request (and is continuing to review the documents of Eva Almirantearena and Roy Batista) and has produced and/or will produce additional contemporaneously-created, non-privileged responsive documents obtained from these Retention Custodians consistent with this Supplemental Response. Consistent with the foregoing, Intel has produced or will produce documents sufficient to describe the operation, purpose and application of Intel's automatic deletion policies and practices applied to email or other electronic data. Therefore, a narrative is no longer necessary.

REQUEST FOR PRODUCTION NO. 3:

Documents sufficient to describe fully how Intel's automatic deletion policies and practices have operated with respect to the email or other electronic data of each Intel Custodian, including the specific interval or period of time (whether 35 days, 45 days, 60 days or another period) each Intel Custodian's email or other electronic data was subjected to such automatic deletion.

RESPONSE TO REQUEST FOR PRODUCTION NO. 3:

Intel incorporates its General Objections and General Response to Document Requests by reference. Intel objects that supplying a custodian by custodian response would be both unfairly burdensome and overbroad, as that information is not readily available in summary form.

SUPPLEMENTAL RESPONSE TO REQUEST FOR PRODUCTION NO. 3

Intel will also provide in summary form the known mailbox retention policies as of May 2005 for each Intel Custodian.

REQUEST FOR PRODUCTION NO. 4:

Documents sufficient to describe fully the “tiered process to identify and preserve potentially relevant paper and electronic records” developed by Intel and referred to on page 1 of Intel’s March 5, 2007 letter to the Court.

RESPONSE TO REQUEST FOR PRODUCTION NO. 4:

Intel incorporates its General Objections and General Response to Document Requests by reference. Intel will produce the responsive documents from the Collection as set forth in its General Response. In addition, Intel believes its April 23, 2007 Report provides information directly responsive to this Request.

SUPPLEMENTAL RESPONSE TO REQUEST FOR PRODUCTION NO. 4:

Intel reasserts its responses and objections to this Request. Intel has produced and/or will produce non-privileged documents from the Collection responsive to this Request as set forth in its General Response.

REQUEST FOR PRODUCTION NO. 5:

Documents sufficient to evidence fully all efforts undertaken by Intel to ensure that information relevant to this Litigation was not subject to, or being deleted by, the “auto-delete” functions of any computer system or storage device operating with respect to or containing any Intel custodian data.

RESPONSE TO REQUEST FOR PRODUCTION NO. 5:

Intel incorporates its General Objections and General Response to Document Requests by reference. Intel will produce the responsive documents from the Collection as set forth in its General Response.

SUPPLEMENTAL RESPONSE TO REQUEST FOR PRODUCTION NO. 5:

Intel reasserts its responses and objections to this Request. Intel believes that the Retention Custodians most likely to possess an appreciable quantity of contemporaneously-created relevant documents regarding this Request are Eva Almirantearena, Roy Batista, Dorr Clark and Curtis Smith. Intel has re-reviewed documents obtained from these Retention Custodians with respect to this Request (and is continuing to review the documents of Eva Almirantearena and Roy Batista) and has produced and/or will produce additional contemporaneously-created, non-privileged relevant documents obtained from these Retention Custodians consistent with this Supplemental Response.

REQUEST FOR PRODUCTION NO. 6:

All documents constituting or evidencing communications by Intel to any Intel Custodian informing them that if they did not act affirmatively to preserve their email and/or other electronic data it would be automatically deleted pursuant to an “auto-delete” function.

RESPONSE TO REQUEST FOR PRODUCTION NO. 6:

Intel incorporates its General Objections and General Response to Document Requests by reference. Intel will provide documents sufficient to evidence the directions or other instructions employees receive into the functioning of its email aging system.

SUPPLEMENTAL RESPONSE TO REQUEST FOR PRODUCTION NO. 6:

Intel reasserts its responses and objections to this Request. Intel believes that the Retention Custodians most likely to possess an appreciable quantity of contemporaneously-created, relevant documents regarding this Request are Eva Almirantearena, Roy Batista, Dorr Clark and Curtis Smith. Intel has re-reviewed documents obtained from these Retention

STATEMENT REGARDING PRIVILEGE LOGS

Pursuant to the Stipulation and Order Regarding the Preparation of Privilege Logs, entered August 10, 2006, various broad categories of privileged communications "do not need to be included on each party's privilege log." Intel does not intend to create a privilege log for the Investigation Documents or Culpability/Causation Documents. However, in accordance with AMD's request, Intel will identify in summary form categories of documents withheld from production. It is Intel's hope that a mutually satisfactory non-waiver agreement can be negotiated to further limit the number of documents withheld.
