**YOUR PACKAGE CONTAINS:** 

- Hub
- Power Adapter
- Quick Installation Poster
- Networking Basics
- CableKeeper Ring

# **Steps**

- Make connections between your PC and the hub using Category 5 100Base-TX cable. Start with port 1. The cable length must not exceed 328 feet (100 meters).
- Connect the power adapter to the hub and to the power source.
- Turn on the hub and all connected devices. The hub's front panel light for each connected device should glow.
  - The hub installation is complete!

#### **Configuring Your PCs** To Use The Network

Your PCs need to be configured to communicate with each other. Locate "Setting up Windows\* 95 networking" in your literature packet for step-by-step instructions.

#### **Easy Expansion**

To expand your network by connecting this hub to another 10 or 100 Mbps hub or switch, connect a standard Category 5 100Base-TX cable from the "Out to Hub/X" port on this hub, to any standard port of the other hub or switch.

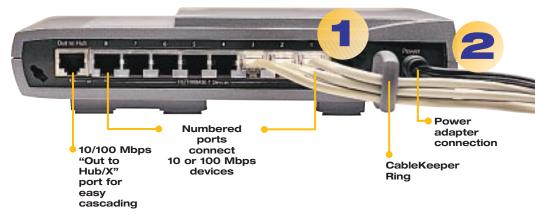

Important! If expanding beyond four linked hubs you must next connect to a switch. See "Connecting 10 and 100 Mbps segments together" in Networking Basics for more information."

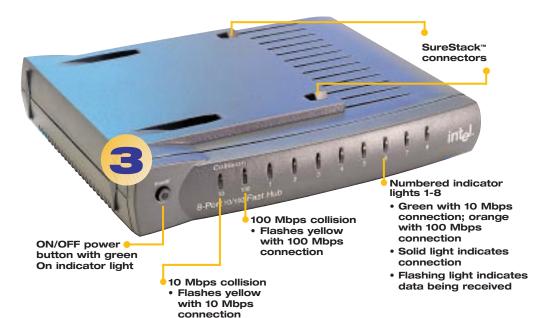

Category 5 standard cable to connect "Out to Hub/X" port to any standard port of other hub or switch

Cable length must not exceed 328 feet (100 meters)

#### Intel® InBusiness™ 8-Port 10/100 **Fast Hub**

NOTE: All connections operate in half-duplex mode.

#### Keeping **Things Neat**

- ✓ Place the hub in a convenient central location. Snap the CableKeeper ring into its slot and rotate to a vertical position. Draw the cables through
- ✓ Stack your Intel InBusiness products vertically or horizontally using the unique SureStack<sup>™</sup> connectors. Press together firmly to ensure a good connection. If you wallmount this product, use the template in the center of the Networking Basics book.

### **Have a Question?**

Try these suggestions if you have a problem after installation.

- ✓ Check power, and all RJ-45 connections. Power up all devices. Check for link light on
- ✓ Cable quality should be Category 5 for this product. (Category 3, 10Base-T cable can be used with 10 Mbps segments. However, to avoid confusion, we recommend using Category 5 cable for this product.)
- If you do not have a link light, replace the cable to the unlit port. Keep cable lengths within the standards documented in these instructions.
- When connecting to other hubs or switches, follow the expansion examples exactly.

Review Networking Basics for tips on keeping your network operating at peak performance.
