#### **Errata and Contingencies**

		Expiry Date	ID		
Operating System	Failing Test		Number	Туре	Error Description
Windows 8 64-bit	USB Exposed Port System Test	9/30/2013	1435	AutoTriage	The USB Exposed Port Controller Test is known to fail without logs in certain configurations using the xHCl Controller on this system. Please right-click the failed task to review the Error information. If the task failed with ExitCode c0000374, a manual erratum might apply. Before using the manual erratum, it is necessary to review the PortMappingFinder.wtl log for the Port Mapping Tool task. If the log contains any 'No companion port for SuperSpeed port' errors, please contact the xHCl Controller vendor for a firmware update and do not attempt to use the manual erratum. If there are no errors, but there is a 'Couldn't get connector properties for hub' message, please use Manual Errata 1435 in a Readme form. The erratum will only be honored if this AutoTriage filter applies to the Run Test task.
Windows 8 64-bit	UAA Test (System)	3/31/2014	1039	Errata	Input Payload should be 0x1d, but is instead 0x0. This is being requested as a change to the HDAudio spec
Windows 8 64-bit	UAA Test (System)	10/1/2013	244	Errata	Section 3.3.14 of the Intel High Definition Audio specification mandates a reset value of 0 for the Interrupt Control register on HD Audio controllers.
Windows 8 64-bit	UAA Test (System)	7/1/2014	354	Errata	The FIFO size for Input and Output Stream Descriptors should be read only
Windows 8 64-bit	USB3 Termination	10/1/2013	1407	Errata	The USB3 Termination test may fail to find the USB 3.0 (Super Speed) device if the system's USB ports are not numbered contiguously. While nearly all systems have contingous USB port numbers, it is not technically required. If this filter allows the FindUsb3Device task to pass, then HCK Errata ID 1407 can be used in a Readme form to overturn the remaining cancelled tasks.
Windows 8 64-bit	xHCl Debug Capability Compliance (Logo)	7/31/2014	316	Contingency	The XHCI Debug Capability Compliance Test will fail XHCI controllers that do not provide the debug capability registers.
