

Motherboard Logo Program (MLP)

Intel® Desktop Board DQ670W

MLP Report

3/24/2011

Purpose:

This report describes the DQ670W Motherboard Logo Program testing run conducted by Intel Corporation.

THIS TEST REPORT IS PROVIDED "AS IS" WITH NO WARRANTIES WHATSOEVER, INCLUDING ANY WARRANTY OF MERCHANTABILITY, FITNESS FOR ANY PARTICULAR PURPOSE, OR ANY WARRANTY OTHERWISE ARISING OUT OF ANY PROPOSAL, SPECIFICATION OR SAMPLE.

Information in this document is provided in connection with Intel products. No license, express or implied, by estoppels or otherwise, to any intellectual property rights is granted by this document or by the sale of Intel products. Except as provided in Intel's Terms and Conditions of Sale for such products, Intel assumes no liability whatsoever, and Intel disclaims any express or implied warranty, relating to sale and/or use of Intel products including liability or warranties relating to fitness for a particular purpose, merchantability, or infringement of any patent, copyright or other intellectual property right. Intel products are not intended for use in medical, life saving, or life sustaining applications.

Intel retains the right to make changes to its test specifications at any time, without notice.

The hardware vendor remains solely responsible for the design, sale and functionality of its product, including any liability arising from product infringement or product warranty.

Desktop Board DQ670W FAB C Configuration Report: Completion of MLP

Data in this section reflects system configuration at time of MLP submission.

Board Information

Product Code ¹	BIOS String/Model	Technologies NOT Logo'd (yet)		
DQ670W	SWQ6710H.86A.0037.2010.1222.1328	N/A - all technologies logo'd		
Processor				
Speed	3.4GHz			
Family	Intel® Core i7-2600 D2			
Bus Speed	100 MHz			
Motherboard				
Board AA #	G12528			
Board FAB #	300			
	es to the production FAB revision; Please co sion you intend to perform logo testing if no	nsult your Intel Corporation representative to clarify the the same.		
System Memory				
Speed	Dual Channel, DDR3, 1333MHz			
Memory Type	DIMM			
Connector Type	pe DDR3, 240 Pin			
Power Management				
BIOS Default	S3			
Operating System Tested				
	Check Tested	Comments		
Windows 7 32 and 64-bit	\square	Windows 7 Ultimate		
Windows Vista 32 and 64-bit	\square	Windows Vista Ultimate with Service Pack 2		

¹ These are the product names to enter in the "Submission ID of previously logo'd qualified PC system or server" field during your "System Using a Previously Logo'd Motherboard" submission to Microsoft.

Errata and Contingencies

Operating System	Failing Test	Expiry Date	ID Number	Туре	Error Description
Windows Vista- Windows Vista- 64bit	Vista:HDAudio Class Driver Fidelity Test - Vista (System, Manual) Win7:Class Drive Fidelity Test - Win7 (System, Manual)	07/31/2011	598	Erratum	Issue Description: The European Union requires the headphone output level to be <= 150 mVrms for headphone jacks. There's a note in WLP requirement AUDIO-0006 that states, in the presence of regional regulations, the output level requirement for headphones is dropped from >= 1000 mVrms to >= 120 mVrms. This provides freedom for manufacturers to meet both the EU <= 150 mVrms @ 32 Ohms and the WLP >= 120 mVrms @ 32 Ohms requirements. The Fidelity Test tests headphones at 300 Ohm load, though. Without knowledge of the output impedance at the jack, the test cannot extrapolate what the output level at 32 Ohms would have been from the output level at 300 Ohms. The test assumes that the output level at 32 Ohms will be *less* than the output level at 300 Ohms, though. So any measurement >= 120 mVrms at 300 Ohms "could be" a passing result, depending on the output impedance.
windows 7 -64bit					
Windows Vista- Windows Vista- 64bit windows 7 windows 7 -64bit	Vista:HDAudio Class Driver Fidelity Test - Vista (System, Manual) Win7:Class Drive Fidelity Test - Win7 (System, Manual)	06/1/2011	1801	Erratum	Issue Description: There is a test bug which causes the measurement of system noise during Render Power Transition Test to be about 3 dB worse than it should be. This filter forgives errors up to 6 dB.
Windows Vista Windows Vista- 64bit windows 7 windows 7 -64bit	Vista:HDAudio Class Driver Test - Vista or Server08 (System) Win7:Class Drive AC3 Test - Win7 (System)	06/30/2025	1256	Erratum	Issue Description: Run AC3 test on a system with the Microsoft HD Audio class driver installed. Expected results: All AC3 kernel streaming data ranges should advertise MinimumBitsPerSample = 16 and MaximumBitsPerSample = 16. Actual results: HD Audio class driver sometimes advertises MaximumBitsPerSample = 24.
Windows Vista	PCI Hardware Compliance Test	06/01/2011	401	Erratum	Issue Description:

Windows Vista- 64bit windows 7 windows 7 -64bit	For Systems				The following PCI Compliance test failure is acceptable: Bit 15 (Bridge Configuration Retry Enable) in the Device Control register (offset 8h) in the PCI Express Capability table must be read-only and always return 0 as it is reserved for devices other than PCI Express to PCI/PCI-X Bridges. Assertion 13A41D3E-2576-41DC-A67C-525DA3637CEA This failure is acceptable because this is a PCIe 1.1 feature and the WLP requires compliance with only PCIe 1.0a.
Windows Vista	Vista: UAA Test - Vista or	06/01/2011	1300	Erratum	Law Bandallan
Windows Vista- 64bit windows 7	Server08 (System) Win7: UAA Test - Win7 (System)				Issue Description: HD Audio pin configuration document calls out setting Port Connectivity to No Connection as the way to turn a pin off in a particular system. UAA Test incorrectly tests such pins.
windows 7 -64bit					
Windows Vista- Windows Vista- 64bit windows 7	Vista: UAA Test - Vista or Server08 (System) Win7: UAA Test - Win7 (System)	07/01/2011	1466	Erratum	Issue Description: Preview Filter: UAA Test - Intel Low Power DCN says "EPSS implies KeepAlive, but only after July 1st 2011"
windows 7 -64bit					
Windows Vista- Windows Vista- 64bit	Vista:UAA Test - Vista or Server08 (System) Win7:UAA Test - Win7 (System)	02/28/2011	1299	Erratum	Issue Description: Preview filter - Jack Detect Override on digital pin widgets Errata 1299 The HD Audio configuration default register (7.3.3.31 in the HD Audio specification) includes a "Jack Detect Override" flag that can be used to indicate that although a pin widget would normally be capable of jack detection, there is something about this particular system that causes this to be impossible. This was intended to be used, for example, for analog pin widgets that are connected to RCA jacks, which do not allow for impedance detection. Some digital pin widgets are using the Presence Detect pin sense response to indicate that a digital handshake has occured - indeed, HDMI pins have entire DCNs built around this concept, and it applies equally well to S/PDIF pins. A digital converter that supports presence detection should be able to do so in any system, so the "Jack Detect Override" concept should not apply to digital pins.
windows 7 windows 7 -64bit					
Windows Vista	Vista: UAA Test - Vista or	06/01/2015	513	Erratum	Issue Description:

Windows Vista- 64bit windows 7 windows 7 -64bit	Server08 (System) Win7:UAA Test - Win7 (System)		UAA Test requires the Traffic Priority bit to be read/write - however there are two specs that apply, and they conflict. One says the bit must be read/write, the other says it must be read-only. Contact has been made with the author of both specs (Intel) but until this point is clarified we cannot fail submissions containing this test failure.

Test Notes

Operating System	Test	Description
