

WARNING

Disconnect the server board's power supply from its AC power source before you connect or disconnect cables, or install or remove any board components. Failure to do this can result in personal injury or equipment damage. Some circuitry on the server board can continue to operate even though the front panel switch is off.

CAUTION

Electrostatic discharge (ESD) can damage server board components. Install the board at an ESD-controlled workstation. If such a workstation is not available, wear an antistatic wrist strap or touch the surface of the antistatic package before handling the board.

Safety and Regulatory Notice

See the Intel® Server Board Product Guide for all applicable regulatory compliance statements, product certification markings, and safety and electromagnetic compatibility (EMC) standards and regulations the server board is compliant with.

Replacement Battery Warning Label Provided: Place the label inside the chassis in an easy-to-see location near the battery but not on the board itself.

Use Only for Intended Applications: All Intel server boards are evaluated as Information Technology Equipment (I.T.E.) for use in personal computers (PC) for installation in homes, offices, schools, computer rooms, and similar locations. The suitability of this product for other PC or embedded non-PC applications or other environments, such as medical, industrial, alarm systems, test equipment, etc., may not be supported without further evaluation by Intel.
