

Intel® RAID RS2, RS25, RMS2 and RMS25 Family Products featuring 6Gb/s SAS and SATA Capability

Product List and Configuration Guide

A reference guide to assist customers in ordering RAID products.

Revision 3.0

November 2012

Enterprise Platforms and Services Marketing

Revision History

November `11 – Rev0.5 – First Revision.

November `11 – Rev0.7 – Added chip model for each controller and module. Added cable information.

December `11 – Rev1.0 – Initial public release.

July `12 – Rev2.0 – Added RS25FB044 and cable information.

November `12 – Rev3.0 – Updated RAID product pictures and compatible matrix table.

1.1 Product Descriptions - Overview

Intel® 6Gb RAID Products. Including RAID controllers, modules and expanders. Customer orders an RAID solution validated across Intel server product line and perhaps a cable (see details below).

Intel's 6Gb/s SAS RAID cards have product names per the convention RS2XX##^ where:

- R = RAID (RM is used for RAID Modules and RE is used for RAID Expanders)
- S = SAS ("T" would be used for SATA)
- 2 = specification generation (25 is the second generation of SAS 2 products)
- XX = two letters representing the Intel code name (For example, DB = Delray Beach)
- ## = internal port count
- ^ = external port count

SAS/SATA cables are included in RS2 family products. However, cables are not included in RS25, RMS25 or RMT3 generation products. For these products, Intel has made two accessory SKUs available.

SAS expanders may ship with cables depending on the sku, please check below for details on cable inclusion information. Cables shipped with these products may not support every chassis/backplane configuration. Customers will need to verify the type of cable needed. If the product does not ship with the correct cable, customers can source a third party cable or order the correct Intel cable kit. Please check the Intel website or contact local Intel sales representative for additional information.

Batteries and Maintenance Free Backup Units are shipped as a kit which includes required cables and a retention bracket for remote mounting in an Intel chassis.

1.2 RAID Controller Order Codes
