## Intel AppUp<sup>SM</sup> Small Business Service Built on the Intel® Hybrid Cloud Platform User Guide – GFI WebMonitor 2011\*

By default, GFI WebMonitor 2011\* Application Installation occurs while its services run on the local system account. WebMonitor utilizes the following three services:

- GFI Proxy
- GFI WebMonitor
- GFI WebMonitor Attendant Service

It is advisable to run these services as Administrator. Instructions for initializing the three services are here:

- 1. Go to services.msc (Start  $\rightarrow$  Run  $\rightarrow$  services.msc). All three services will be listed.
- 2. Right click on 'GFI Proxy' service to launch Properties.
