Intel AppUpSM Small Business Service Built on the Intel® Hybrid Cloud Platform Installation Guide - Intuit QuickBooks Pro 2011*

Notes :

- (1) The Intuit QuickBooks Pro 2011* appliance is available on the Intel[®] Hybrid Cloud server with system build 3.0 or later.
- (2) To install the Intuit QuickBooks Pro 2011 appliance, go to the Intel Hybrid Cloud catalog page available on the following location
 - On the Intel[®] Hybrid Cloud web portal, <u>https://hybridcloud.intel.com</u>, login using your MSP ID. Access the Catalog link on the left hand side of the screen, and look for the Intuit* application.

Launching the Intuit QuickBooks appliance within Microsoft Windows 2008 Web Server*

Note: The Intuit QuickBooks appliance contains a pre-installed instance of the Intuit QuickBooks Pro 2011 accounting software on the Microsoft Windows 2008 Web Server operating system.

- (1) Login into the appliance (via Intel Hybrid Cloud server manager) and launch console from Start menu → All Programs → QuickBooks → QuickBooks Pro 2011
- (2) By default, the Internet Security Levels are set to "High" under Microsoft Internet Explorer* and the message below may appear:

Copyright © 2012 Intel Corporation. All rights reserved. Intel and the Intel logo are trademarks of Intel Corporation in the U.S. and/or other countries.

Intern	Internet Security Levels Are Set Too High					
<u>^</u>	The security for Microsoft Internet Explorer has been set higher than the default levels. To use all the features provided by QuickBooks, you must reduce the security levels for the "Internet" zone.					
	Click the Make Changes button to open the Internet Options control panel and make your changes. A Help Topic will appear to walk you through the process of reducing the security levels.					
	To read more information about security levels prior to making your changes, click the Help button.					
	If you do not want to reduce your security levels, click the Cancel button. Note that if you click the Cancel button, some QuickBooks features will not work correctly.					
	Make Changes Help Cancel					

- (3) To change the security level settings under Microsoft Internet Explorer, go to Start menu → Administrative Tools → Server Manager
- (4) Under Security Information summary, click on the **Configure IE ESC**

Intuit* QuickBooks Pro 2011 is shipped with a licensed version

It is not recommended to use Intuit QuickBooks Pro with the shipped license.

To obtain a new license for Intuit* QuickBooks, contact Intel Customer support at http://www.intel.com/support/progserv/appupsbs/hybrid/sb/CS-032313.htm and provide the following information:

- (1) MSP Name and company name
- (2) E-mail address
- (3) Asset Tag of the Intel[®] Hybrid Cloud server where Intuit^{*} QuickBooks will be installed.

After acquiring the license, change the license number. To change the license number, follow the instructions below:

- (1) Under Help menu, choose Manage My Licenses,
- (2) Then choose Change My License Number.
- (3) Input the license number and product ID that was obtained from Intel.
