Intel AppUp<sup>SM</sup> Small Business Service Built on the Intel® Hybrid Cloud Platform Intuit QuickBooks Pro 2012\* Quick Start Guide

This document provides information on how to start, configure security settings, and uninstall Intuit QuickBooks Pro 2012 on an Intel Hybrid Cloud server.

## How to start and use QuickBooks Pro 2012

Prerequisite: Intuit QuickBooks Pro 2012 must be already installed on one of the Windows-based appliances on the Intel Hybrid Cloud server

- 1. Log into Hybrid Cloud Server Manager.
- 2. Select **Appliances** Appliances button, the Appliances page opens.
- 3. Select the appliance where Intuit QuickBooks Pro 2012 is installed on.
- 4. If the appliance is Stopped, click on the **Start** button. Select the **Console** tab. The **Console** page opens.
- 5. Click the Launch button next to VNC Console. The VNC window opens up.
- 6. Log into the appliance.
- Choose Start → All Programs → QuickBooks → QuickBooks Pro 2011. "Internet Security Levels Are Set Too High" window pops up. Leave it open while completing the following steps.

Interne	et Security Levels Are Set Too High									
Â	The security for Microsoft Internet Explorer has been set higher than the default leve use all the features provided by QuickBooks, you must reduce the security levels for t "Internet" zone.									
	Click the Make Changes button to open the Internet Options control panel and make your changes. A Help Topic will appear to walk you through the process of reducing the security levels.									
	To read more information about security levels prior to making your changes, click the Help button.									
	If you do not want to reduce your security levels, click the Cancel button. Note that if you click the Cancel button, some QuickBooks features will not work correctly.									
	Make Changes     Help     Cancel
