# Release Notes for Intel® Data Migration Software powered by Acronis

### Overview

Acronis is pleased to announce Intel® Data Migration Software.

Intel® Data Migration Software provides a set of powerful and easy-to-use utilities for Intel drives. If you are going to install a new drive, Intel® Data Migration Software will help you transfer information from the old one just in minutes, including the operating systems, applications, documents, and personal settings. After migrating to the new drive you can securely destroy all confidential information on the old one.

Intel® Data Migration Software can be upgraded to full-featured Acronis software.

### **Installation Notes**

You need at least one Intel SSD in your system to install and run the product.

The installation procedure is straightforward. Run the downloaded executable file and follow the instructions on the screen.

# System Requirements

The hardware requirements of Intel® Data Migration Software correspond to the minimum requirements for the operating system installed on the computer to be used for running Intel® Data Migration Software.

- Intel SSD
- CD-RW/DVD-RW drive for bootable media creation
- Mouse or other pointing device (recommended).

Intel® Data Migration Software rescue media has the following hardware requirements:

- 256 MB RAM
- Processor Pentium 1 GHz or faster

The recommended minimum screen resolution is 1152 x 864.

# **Build 15056**

#### About this release:

Release date: March 12, 2013

Languages: Brazilian Portuguese, Chinese Simplified, Chinese Traditional, English, French, German,

Italian, Japanese, Korean, Polish, Russian, Spanish

**Build number: 15056** 

#### **Changes:**

Brazilian Portuguese localization has been added.

- Chinese Simplified localization has been added.
- Chinese Traditional localization has been added.
- French localization has been added.
- German localization has been added.
- Italian localization has been added.
- Japanese localization has been added.
- Korean localization has been added.
- Polish localization has been added.
- Russian localization has been added.
- Spanish localization has been added.

# **Build 15055**

#### About this release:

Release date: March 07, 2013

Languages: English
Build number: 15055

#### **Changes:**

- Acronis Loader was updated to address the issue with bootability on Dell machines with UEFI interface.
- Linux kernel was updated to the latest version level.

# **Build 15051**

#### About this release:

Release date: November 14, 2012 Languages: Brazilian Portuguese

Build number: 15049

#### **Changes:**

Brazilian Portuguese localization has been added.

# **Build 15047**

#### About this release:

Release date: November 8, 2012

Languages: Chinese Simplified, Chinese Traditional, English, French, German, Italian, Japanese,

Korean, Polish, Russian, Spanish

Build number: 15047

#### **Changes:**

ATIOEMIIIOIOCU-553: Clock icon that appears during a delay was made animated.

 ATIOEMIIIOIOCU-554: Unnecessary check box offering to reboot a machine after a clone operation in the Linux environment has been removed.

# **Build 15046**

#### About this release:

Release date: October 31, 2012

Languages: Spanish
Build number: 15046

#### **Changes:**

Spanish localization has been added.

# **Build 15045**

#### About this release:

Release date: October 31, 2012 Languages: Chinese Simplified

**Build number: 15045** 

#### **Changes:**

Chinese Simplified localization has been added.

# Build 15044 (Update 3)

#### About this release:

Release date: October 31, 2012

Languages: Chinese Traditional, English, French, German, Italian, Japanese, Korean, Polish, Russian

**Build number: 15044** 

#### **Fixes**

- Branding-related inaccuracies have been fixed.
- Cloning operation in the pre-boot Acronis environment ends with a dialog box where a user can select to reboot or shut down the machine.
- Sand glass timer is displayed during a delay in the pre-boot Acronis environment.

#### **Known issues**

- When Intel Data Migration Software is removed from a system, a few product folders and registry keys may retain in the system.
- Intel Data Migration Software is incompatible with earlier versions of Intel Align Tool. Depending on which product has been installed in the system first, the other will run with issues. The problem is caused by different versions of the same low-level library used in both products. As a workaround, Acronis will provide an updated version of Intel Align Tool upon demand.
- Windows restore points on a source system are not migrated through a cloning operation. This issue cannot be addressed because Microsoft ties information about Windows restore points to absolute sector location, which naturally changes when a drive is resized as a result of a cloning operation.

# Build 15011 (Update 3, Beta)

#### About this release:

Release date: October 17, 2012

Languages: English
Build number: 15011

#### **Changes:**

- Base product has been changed to True Image 2013 by Acronis.
- Support of GPT disks and UEFI architecture has been added.
- Basic support of Windows 8 has been added. The following Windows 8 features are not supported: Storage spaces and Secure Boot.

#### **Known issues:**

- Program help has minor inaccuracies in formatting and branding.
- Upgrade from build 14133 (penultimate public release) goes with issues.
- Program GUI has a few branding-related inaccuracies.
- Program GUI has a few irrelevant elements that have been inherited from the base product.

# **Build 14152**

#### About this release:

Release date: April 17, 2012

Languages: Chinese Simplified, Chinese Traditional, Italian, Korean, Spanish

Build number: 14152

#### **Changes:**

- Chinese Simplified localization has been added.
- Chinese Traditional localization has been added.
- Italian localization has been added.
- Korean localization has been added.
- Spanish localization has been added.

# **Build 14151**

#### About this release:

Release date: April 17, 2012

Languages: Japanese Build number: 14151

#### **Changes:**

Japanese localization has been added.

# **Build 14150**

#### About this release:

Release date: April 17, 2012 Languages: French, Russian

Build number: 14150

#### **Changes:**

- French localization has been added.
- Russian localization has been added.

# **Build 14149**

#### About this release:

Release date: April 17, 2012

Languages: Brazilian Portuguese, German, Polish

Build number: 14149

#### **Changes:**

- Brazilian Portuguese localization has been added.
- German localization has been added.
- Polish localization has been added.

### **Build 14148**

#### About this release:

Release date: January 13, 2012

Languages: English
Build number: 14148

#### **Changes:**

Rephrased warning message about missing Intel drives.

# Build 14147 (Update 2)

#### **About this release:**

Release date: December 27, 2011

Languages: English
Build number: 14147

#### **Changes:**

Available target drives for the clone operation have been limited to Intel SSDs only.

Warning message appears when an Intel SSD cannot be detected as the target drive.

### **Build 14144**

#### About this release:

Release date: March 17, 2011 Languages: Brazilian Portuguese

Build number: 14144

#### **Changes:**

Brazilian Portuguese localization has been added.

# Builds 14134, 14135

#### About this release:

Release date: November 24, 2010

Languages: German, French, Italian, Spanish, Japanese, Korean, Traditional Chinese, Simplified

Chinese, Russian, Polish

Build number: 14134, 14135

#### Fixes:

Localized EULAs had been updated.

### **Build 14133**

#### About this release:

Release date: November 02, 2010

Languages: English
Build number: 14133

Fixes:

■ Intel Data Migration Software now can be installed correctly with Intel SSD X25-E connected.

# **Build 14131**

#### About this release:

Release date: October 29, 2010

Languages: English
Build number: 14131

**Fixes:** 

An algorithm of migration from Intel SSD had been fixed.

# **Build 14129**

#### **About this release:**

Release date: October 22, 2010

Languages: English
Build number: 14129

#### **New features:**

- Support for Intel X25-E SSD disk.
- New End-user license agreement.

#### Fixes:

- The "Start Now" button does not fit the window after window resize.
- Intel® Data Migration Software still offers cloning to the SSD disk even though the system has already been cloned and successfully booted.
- Wrong order of components in a bootable media menu.

### **Build 14124**

#### About this release:

Release date: September 03, 2010

Languages: English

Build number: 14124

#### **Fixes:**

- Upgrading to Acronis True Image Home 2010 and Acronis True Image Home 2011 has been fixed.
- The product name has been changed in GUI to Intel® Data Migration Software.
- Various bugfixes.

# Build 14114 (Beta)

#### **About this release:**

Release date: August 06, 2010

Languages: English
Build number: 14114

#### Fixes:

- GUI is updated.
- After cloning to a USB disk, it will be automatically disconnected through a "Safely Remove Hardware".
- For calculating the Intel SSD capacity to be displayed in the GUI, the software multiplies the size in bytes by 10<sup>-9</sup>, and then rounds it to the nearest 10.
- Various bugfixes.

# Build 14108 (Alpha)

#### About this release:

Release date: July 23, 2010

Languages: English
Build number: 14108

#### **Known issues:**

- Wrong product name may appear in wizards
- Update function is not removed from GUI
- There may be incorrect support links in the main program window
- Text may be not aligned in a Simple Disk Cloning dialog due to the wrong window size

Kindest regards, Acronis Team
