- Fixed S3 resume issue with processors running at 3.8GHz.

BIOS Version 0333

About This Release:

- November 15, 2004
- OM91510J.86A.0333.2004.1112.1609
- VBIOS Build 3402

New Fixes/Features

- Removed setup option for two non-existing SATA ports.
- Fixed an issue where the system would hang during shut down if the wake on LAN from S5 is enabled.
- Fixed S3 resume issue with Intel® Pentium® 4 570J with HT Technology.
- Fixed an issue with the Password being set or cleared when Load Custom/Optimal Defaults or the F9 key is selected.
- Fixed an issue where certain exit menu items can not be accessible even when Administrator password is entered.
- Fixed an issue where the Intel® Integrator Toolkit remove option cleared the current installed password.
- Fixed an issue where the "Set Supervisor Password" menu is not accessible when entering setup without a password.
- Added MP Table support
- Implemented "Intel® EM64T Capable" dynamic string display on Main page in System Setup.
- Fixed issue with some JPG file based logos
- Fixed an issue where the F10 and F12 key didn't function during POST.
- Updated the Intel PXE base to ROM 4.1.15.

BIOS Version 0316

About This Release:

- October 6, 2004
- OM91510J.86A.0316.2004.1006.1143
- VBIOS Build 3402

New Fixes/Features

- Added support for PXE.

BIOS Version 0315

About This Release:

- October 4, 2004
- OM91510J.86A.0315.2004.1004.0747
- VBIOS Build 3402

New Fixes/Features

- Added support for System Locked Preinstallation (SLP) string.
- Fixed an issue where the "User/Administrator Password" was not cleared when the "Clear all password" was selected in the Maintenance mode screen.
- Fixed an issue where a user could access the F9 and F10 keys, "Save and Exit", "Load default", and the "Load/Save Custom Defaults" fields even though View Only was set to "User access" level.
- Fixed an issue where a user could change the "SDRAM timing" control and "CPC override" field when user access level was set to View Only.
- Corrected spelling in setup string for "Lowest Fan speed" to "Lowest Fan speed" and "removable" changed to "removable." Removed spaces in front of the string "SDRAM tRASmin."
- Removed unused setup question for the fan control. Two of the fan control setup options were not used in the BMI sequence.

BIOS Version 0301

About This Release:

- September 23, 2004
- OM91510J.86A.0301.2004.0923.2037
- VBIOS Build 3402

New Fixes/Features

- Initial release.
